Why do Fruit Trees cost more to plant than the less expensive pine and spruce trees???

Unlike non-fruit trees that you can set and forget it takes A LOT to plant FRUIT trees!

1. Find a suitable location and purchase it.
2. Prepare the land by clearing away rocks and thorn bushes.
3. Bring water, electric and other infrastructure to the site.
4. Install a fence around the entire area to keep away the animals.
5. Turn over, flatten and fertilize the soil.
6. Install a computerized irrigation system.
7. Strategically plan and carefully plant all the trees.
8. Weed, water, fertilize, and prune them for 3 years (Orlah).
9. AFTER 4 years we can finally redeem the fruits (Neta Revai).
10. On the 7th year (Shmitta) no pruning or selling the produce.

Planting FRUIT trees fulfills the Mitzvah (Commandment) to plant FRUIT trees when entering and returning to the land of Israel as stated in (Leviticus 19:23 ויקרא 19:23)

וְכִי תֵבֹאוּ אֶל הָאָרֶץ וּנְטַעְתֶּם כָּל עֵץ מֵאֵכֶל

When you come to the Land of Israel plant FRUIT trees

The reason Moshe (Moses) wanted to enter the land of Israel so much was to fulfill the Mitzvot "Hetluyot Ba'aretz" (applicable only in the land of Israel) such as: Orlah, Netta Rivai, Shemitta, Terumot, Maasrot, Kelayim, Bikurim etc...

Everyone who purchases a fruit tree to be planted by a farmer in Israel is a partner with the farmer in ALL the mitzvot that Moshe wanted to fulfill but never had the chance.

It's also a LOT less expensive than flying to Israel to perform all these mitzvot:

"וְצִוִּיתִי אֶת-בְּרַכְתֵּי לָכֶם"

Partner with a Farmer and Share the Blessing!
